- Internet Explorer 10+ (pop-ups must be permitted and compatibility mode must be set to "off")
- Google Chrome 34+ (pop-ups must be permitted for the application)
- Firefox 30+ (pop-ups must be permitted for the application)
- Edge 20+ (pop-up blocker must be "off")
- Mobile browsers now supported (P3Web ME)!
 - Safari
 - Chrome iOS/Android
 - Firefox iOS/Android
 - Edge iOS/Android
 - Opera iOS/Android

Server Compatibility:

- MS .NET Framework v4.5
 - Windows Server 2008 SP2+
 - SQL Server 2008 R2+
 - IIS 7+
-

General:

What's New?

- "Go There" functionality modified
- Updated AJAX Control Toolkit to latest stable release (19.1)

Bug Fixes:

- Document Editing/Status Control Permissions calculations improved

Known Issues:

- Closing the Document Viewer window using the Windows "close" button can suppress the view file deletion function, depending on the browser being used. Use the P3Web "Close" button on the document toolbar instead.
- FIPS compliant systems may encounter errors when authenticating. At this time the only workaround is to disable FIPS compliance on the web server running P3Web. We are examining ways to eliminate this error in a future release.

Security:

- Clicking on any document/record now initializes an updated security filter that more accurately can assess whether or the user has adequate permissions to the document/record.

Action Items:

- The “Go There” button now takes the user directly to the folder as the root of the tree view to improve performance. To refresh the tree view to the specified system root, click the associated module button in the lower left.

Documents, Records, Improvements, & Training:

- Clicking on any document/record now initializes an updated security filter that more accurately can assess whether or the user has adequate permissions to the document/record.
