# P3Web v4.6.0.0 Release Notes

7/2/2019

## Browser Compatibility:

- Internet Explorer 10+ (pop-ups must be permitted and compatibility mode must be set to "off")
- Google Chrome 34+ (pop-ups must be permitted for the application)
- Firefox 30+ (pop-ups must be permitted for the application)
- Edge 20+ (pop-up blocker must be "off")
- Mobile browsers now supported (P3Web ME)!
  - Safari
  - Chrome iOS/Android
  - Firefox iOS/Android
  - Edge iOS/Android
  - Opera iOS/Android

## Server Compatibility:

- MS .NET Framework v4.5
  - Windows Server 2008 SP2+
  - SQL Server 2008 R2+
  - IIS 7+
- 

## General:

### *What's New?*

- User Guide now included in every build
- Logout/Login button now hidden when set to Windows Authentication
- Saved Reports functionality has been enhanced
- Performance and reliability has been improved when searching
- General performance and stability improvements
- Document viewing/editing improvements

### *Bug Fixes:*

- "Document containing text" search now ignores files in folders which are not permitted to the user
- A DB error that could occur when triggering a Training Assessment has been rectified.
- An ambiguous DB error that could occur when saving records with a blank date field now should now be avoided. Instead, a "date validation" error will appear and inform the user that the process has been terminated.
- Fixed bug in folder security that would hide folders from entities that are members of the assigned entity.

#### *Known Issues:*

- Closing the Document Viewer window using the Windows “close” button can suppress the view file deletion function, depending on the browser being used. Use the P3Web “Close” button on the document toolbar instead.

### **User Guide:**

- A new toolbar button has been added that opens the latest P3Web User Guide in a new browser tab. The guide will be updated with every release that includes new functionalities.

### **Authentication:**

- The “Login” and “Logout” buttons are now hidden when the system is configured to use Windows authentication.

### **Documents:**

- P3Web now copies documents to the public folder for viewing with a unique filename each time it is opened to prevent browser caching and to always load the latest published version.
- Closing the document window (either with close button or “X”) will now delete the viewed file from the public folder.
- The “Edit” button on the toolbar has been replaced with a context-sensitive “Check Out” or “Check In” button. When a selected document is eligible to be edited and is checked in, the “Check Out” button will be visible. Conversely, if the document is eligible to be edited, but is currently checked out, the “Check In” button will be visible.

### **Reports:**

- Saved Reports performance has been improved.
- Items in saved reports can now be opened with a “double-click” of the mouse.
- Reports can now be printed or exported to MS Word, and MS Excel.

### **Search:**

- Performance of all field-based searches has been dramatically improved.
- Performance and reliability has been improved when searching for items containing text.
- “Document containing text” search now ignores files in folders which are not permitted to the user

### **Training:**

- Users can now trigger training assessments from the record toolbar, similarly to the desktop client.
