P3Web v4.11.0.0 Release Notes

5/31/2021

Recommended Browsers:

- Google Chrome 70+ (pop-ups must be permitted for the application)
- Firefox 70+ (pop-ups must be permitted for the application)
- Edge Chromium (pop-ups must be permitted for the application)

Supported Browsers:

- Internet Explorer 11 (pop-ups must be permitted and compatibility mode must be set to "off")
- Edge Legacy (pop-ups must be permitted and compatibility mode must be set to "off")

Server Requirements:

- .NET Framework v4.8 Runtime
- Windows Server 2012 or later
- SQL Server 2012 or later
- IIS 8 or later
- ** Microsoft JET Database Engine v12.0 (64-bit - for external fields linked to MS Access) ** [optional]

General:

What's New?

- Paradigm 3 Users Module now fully supported!
- P3Web Administration tools have been added.
- Module Access now calculated on a "per-user" basis.
- Right-click "context menus" are now available on folders and items.
- Users can now send blank Action Items to other users.
- Users can now "Set republish" for items or folders from the new context menu.

Bug Fixes:

- Security calculation performance for folder security have been further improved.
- An error that occurs when viewing group properties has been corrected.
- A mysterious, gray box that appeared when right-clicking on groups is now corrected.
- Trigger events now trigger for only the assigned user/entity

Known Issues:

- Closing the Document Viewer window using the "Windows Close" button can suppress the deletion code of the temporary view file. Use the P3Web "Close" button on the document toolbar instead to ensure proper removal of temporary view file.
- Saved Searches do not yet work for templates that require date inputs. This will be available in a future version.
- Using MS Interop to open files directly from the document repository will not convert internal Para-Links to hyperlinks. Para-Links can still be accessed using the "Para-Links" button on the Document Viewer toolbar.
- Certain field types are not currently supported in P3Web and others will not be supported in future versions. For a list supported/unsupported field types, contact Chris Reyno at creyno@interaxgrp.com.

General:

- The Paradigm 3 Users module is now fully supported in P3Web! Administrative users have access to the module by default. Normal and Restricted users can access the module as Read-Only. In the Users module, Administrators can now:
  - Add new Users, User Groups, and Organization Entities.
  - Edit existing users (rename, change, disable, delete, etc.)
  - Add/Edit/Delete User Groups and Organization Entities
- P3Web Administration tools are now available to Administrative users. A new "cog" button will appear on the P3Web toolbar for permitted users. In the P3Web Administration tools, administrators can:
  - Change configuration settings for P3Web.
  - Change default module values (Default Login Module, Default folders, etc.)
  - Change applicable Site IDs.
  - Change Domain information.
  - Add/remove/edit Direct Links.
- Module access in P3Web is now calculated when a user logs in. This will display only the permitted modules to which the user has been granted access, regardless of active modules in the license.
- Right-click "Context Menus" are now available for selected items and groups. This menu will grant the following actions to permitted users:
  - Rename (Group or Item)
  - Move (Group or Item)
  - Delete (Group or Item)
  - Change Item Status (Items)
  - View/Modify Properties (Group or Item)
  - Set Republish on Group or Item (Documents only)

Documents:

- Permitted users can now Set Republish for and item or a Group. Setting republish for a group will republish ALL items and sub-groups of the selected group and should be used with care.

Action Items:

- Permitted users can now send blank Action Items to other users or groups.
