P3Web v4.4.0.0 Release Notes
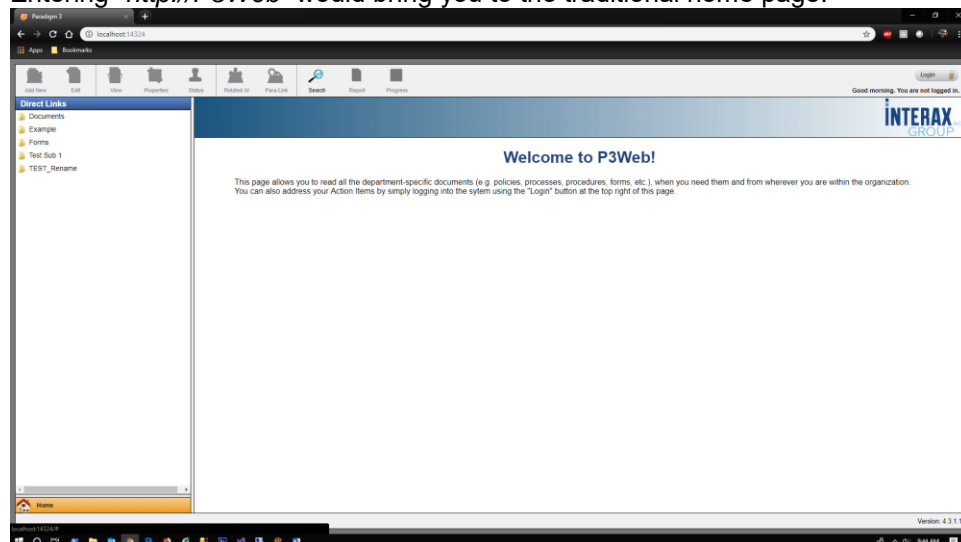

12/28/2018

Browser Compatibility:

- Internet Explorer 10+ (pop-ups must be permitted and compatibility mode must be set to "off")
- Google Chrome 34+ (pop-ups must be permitted for the application)
- Firefox 30+ (pop-ups must be permitted for the application)
- Edge 20+ (pop-up blocker must be "off")
- No mobile browser compatibility (Coming Soon!)

Server Compatibility:

- MS .NET Framework v4.5
- Windows Server 2008 SP2+

General:

- Various performance and stability enhancements.
- Toolbar buttons now will be hidden when not applicable instead of disabled, allowing for a cleaner and more streamlined end-user experience.
- External links now available to specific modules and folders. When linking to P3Web from an outside source, you can now specify the "ModuleID" and "GroupID" in the URL as query strings. The application will interpret the link and take you directly to the module and folder in question. For example:

  - Entering "*http://P3Web*" would bring you to the traditional home page.

- o Entering "*http://P3Web/Default.aspx?ModuleID=3&GroupID=109*" would bring the user directly to the folder view specified (note the syntax)

Search:

- A new app setting has been introduced that allows for auto selection of a search tab upon loading the search window. This is a global setting.
- Searches in Records, Improvements or Training now includes searching by style and field content.
- "Go There" now correctly takes the user to the folder location and selects the appropriate document/record.
- Interface has been streamlined. Non-functional buttons will be hidden until available.

Documents:

- The document list view has been re-worked and is now provides additional details on latest and processing versions.
- Performance has been improved.
- A setting has been added to recognize licenses set with "Restricted Plus Edit" capabilities, opening up functionality to those users.
- Training Links are now accessible from document properties.

Training:

- Competency Assessments are now available when finishing a training requirement. P3Web detects if an assessment has been associated with the requirement and displays questions based upon desired settings. All rules with regard to competency assessments are respected.
- Requirements can no longer be marked as Complete until an associated assessment has been completed and passed.
- Training records can now be added
- Training records can now be edited
