# P3Web v4.5.1.2 Release Notes

4/30/2019

## Browser Compatibility:

- Internet Explorer 10+ (pop-ups must be permitted and compatibility mode must be set to "off")
- Google Chrome 34+ (pop-ups must be permitted for the application)
- Firefox 30+ (pop-ups must be permitted for the application)
- Edge 20+ (pop-up blocker must be "off")
- Mobile browsers now supported (P3Web ME)!
    - Safari
    - Chrome iOS/Android
    - Firefox iOS/Android
    - Edge iOS/Android
    - Opera iOS/Android

## Server Compatibility:

- MS .NET Framework v4.5
- Windows Server 2008 SP2+
- SQL Server 2008 R2+
- IIS 7+

## General:

*What's New?*

- The document list view has been enhanced to hide all versions other than CURRENT, COMPLETE or EVIDENCE when a user is not logged on.
- P3Web now remembers the user's last list view sort order during and between sessions for all modules.
- Improvements made to status change message. The confirmation dialog no longer extends beyond the pop-up window size in Chrome, Edge, Firefox, & Opera.
- The module list now dynamically loads licensed modules and will reflect custom names given via PowerTools.
- Performance enhancements have been made to the Tree View and the Search

*Bug Fixes:*

- Date-Based calculated fields functionality should now be more stable.
- Direct Links to folders in the Action Items module are no longer displayed.
- First Drafts and Pending, Review, Collaborate, & Ready statuses created from first drafts no longer open a view document window when the "View" button is clicked on the toolbar.
- Searches using the "Browse" button no longer continue to search from the root level established when the search tool was opened.

*Known Issues:*

## General:

- The Tree View now populates more efficiently.  It now processes very complex folder structures and security much more quickly.

## Documents:

- When a user is not logged into P3Web, the document list view generated from clicking direct links will now only display CURRENT items in the list.  Draft, Review, Collaborate, Pending, & Ready are hidden until the user logs on.
- A condition where Pending or Review copies of a FIRST DRAFT could be viewed from the P3Web List View via the "View" button on the toolbar has been corrected.
- Document Viewer window has been updated to resist browser caching of documents

## Search

- The "Browse" tree view now populates more efficiently on load.
- Searches have been enhanced for performance and will return results much more quickly. Particularly in larger systems.
