# P3Web/P3WebME Release Notes - v4.12.0.0

11/1/2021

**Recommended Desktop Browsers:**

- Google Chrome 90+ (pop-ups must be permitted for the application)
- Firefox 70+ (pop-ups must be permitted for the application)
- Edge Chromium 90+ (pop-ups must be permitted for the application)

**Legacy Desktop Browsers:**

- Internet Explorer 11 (pop-ups must be permitted and compatibility mode must be set to "off")
- Edge Legacy (pop-ups must be permitted and compatibility mode must be set to "off")

**Recommended Mobile Browsers:**

- Google Chrome 90+
- Edge 90+
- Firefox 38+
- Safari iOS 14+

**Server Requirements:**

- .NET Framework v4.8 Runtime (P3Web)
- .NET Core Hosting Service (P3WebME)
- Windows Server 2012 or later
- SQL Server 2012 or later
- IIS 8 or later
- Microsoft JET Database Engine v12.0 (64-bit - for external fields linked to MS Access)

# What's New?

**P3Web:**

- "Copy to" function now supported in all modules
- Convert to and from Evidence now supported
- "Add New Folder" now allows type selection in Records/Improvements/Training
- Bug fixes and performance improvements
- SAML 2.0 SSO Support – P3Web supports SAML 2.0 SSO Authentication. Communication is handled through the client's chosen SAML Identity Provider (i.e., Ping, Auth0, Okta, etc.).
- other security enhancements

**P3WebME:**

- New mobile browser-based web application for Paradigm 3!
- P3WebME has been optimized for mobile browser interfaces.
- Direct Links to document folders are also available in P3WebME
- Documents module limited support (read-only)
  - Browse folders
  - View Documents
  - Access Documents from Action items (Read-Only)
  - View item history
- Records/Improvements modules now supported
  - Browse folders
  - View Records
  - Open new Records
  - Complete Records
  - Edit Records
  - Address Records from Action Items
  - View item history
- SAML 2.0 SSO Support – P3WebME supports SAML 2.0 SSO Authentication. Communication is handled through the client's SAML Identity Provider (i.e., Ping, Auth0, Okta, etc.).

**Bug Fixes:**

- Move Item/group now correctly moves properties.
- Restricted Users can no longer import documents when "Default Security" is checked on the folder.
- Training module security settings for viewing records now works correctly.
- Fixed a security vulnerability that allowed non-logged on users to add users to Paradigm.

**Known Issues/Outstanding Items:**

- Closing the Document Viewer window using the "Windows Close" button can suppress the deletion code of the temporary view file. Use the P3Web "Close" button on the document toolbar instead to ensure proper removal of temporary view file.
- Saved Searches do not yet work for templates that require date inputs. This will be available in a future version.
- Using MS Interop to open files directly from the document repository will not convert internal Para-Links to hyperlinks. Para-Links can still be accessed using the "Para-Links" button on the Document Viewer toolbar.
- Certain field types are not currently supported in P3Web and others will not be supported in future versions. For a list supported/unsupported field types, contact Chris Reyno at creyno@interaxgrp.com.

## P3Web:

- "Copy To" is now supported in P3Web and is accessible in the right-click context menu for both groups and items.
- Permitted users can now convert items to Evidence and Evidence to items. This is accessible in the right-click context menu for items.
- The "Add New" widget for Records and Improvements now permits selection of form styles.

## P3WebME:

- P3WebME is now in production, with a new, simplified look and feel that is designed for mobile devices and limited edit functionality for permitted users.
- The Records module is now supported. Permitted users can view Records, add new Records, and edit records, and create new open versions of completed Records.
- The Improvements module is now supported. Permitted users can view Improvements, add new Improvements, edit Improvement steps for which they are responsible, finish Improvement steps for which they are responsible, and create new open versions of completed Improvements.
- The Training module now has limited support. Users can view Training records only.
- SAML 2.0 SSO support has been included. More SSO options will follow in future releases.
